

Fig. A.1 : Association of *p53* and *MDM2* genotypes with the frequency of *p53* mutations

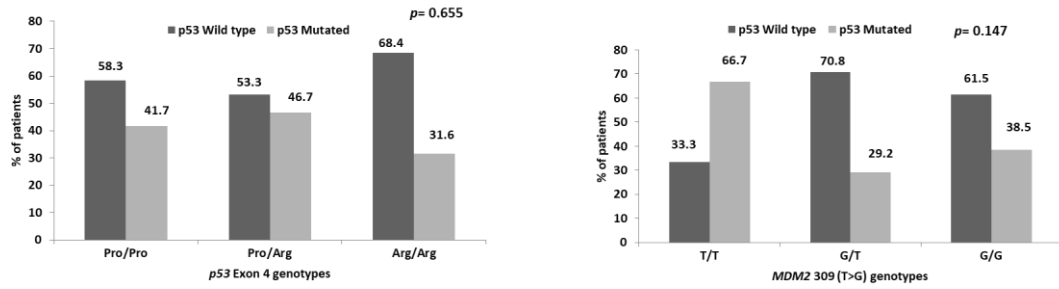

Fig. A.2: Association of transcript levels of VEGFA isoforms' with *p53* exon 4 and *MDM2* SNP309 genotypes

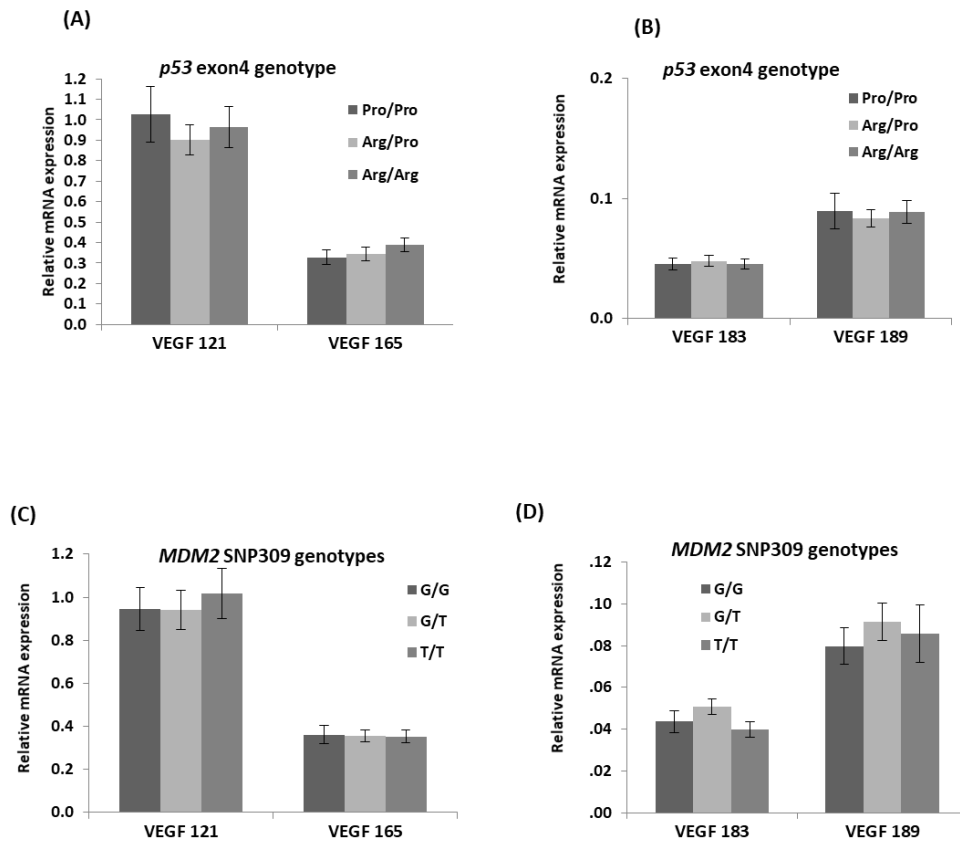

Fig A.3: Association of transcript levels of MMP2 and MMP9 with *p53* mutations

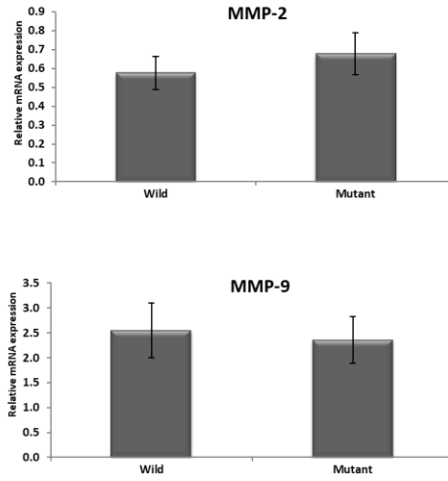

Fig A.4: Association of transcript levels of MMP-2/MMP-9 with *p53* mutations and MDM2 SNP309 genotypes (in combination)
